

# Unit4 Report Error: Navigation to the website was cancelled

## Problem

When I run a web report in Unit4 a statement pops up "Navigation to the website was cancelled".

## Background information

In order to run the web reports from Unit4, we have to configure Internet Explorer to trust \*.royalroads.ca. This is necessary even if the user's default browser is not Internet Explorer.

## Solution

Follow the instructions in this web page (there are quite a few settings to be changed):

[Configure Internet Explorer to Trust \\*.royalroads.ca](#)
