

# Associate Faculty: I cannot access Library Resources

Due to licensing restrictions, only associate faculty with active contracts can have access to library resources.

An associate faculty can be considered inactive once their contract is over for more than 30 days.

Associate Faculty should contact their program head if they feel they should have access. The program head will then contact [Computer Services](#) and they can check in AD if their account is in the @RRU-Associate-Faculty-Library-Access group.
