

# Where can I find the SPSS Statistical Software

Royal Roads has 50 licenses for the statistical software called SPSS. There are 20 licenses available for students to use in the computers in the LIC lab (Main floor LIC building). The 20 computers are located in the 4 center pods in the LIC lab.

The LIC lab is open everyday from 7am - Midnight. (Not available if there is a class scheduled for that room).

For use of the software on non-university owned equipment, Students and associate faculty have the option of purchasing a 6 or 12 month term license from <http://www.onthehub.com/spss/>. A 6 month student license is \$50 and can be obtained online

Core Faculty can request a license through Computer Services by [email](#) or [Online Request Form](#).
